

Skills

- **Programming Languages** : Java, C, Python, HTML, CSS
- **Libraries and Frameworks** : Spring Boot, MVC, JUnit
- **Tools** : SQL, MySQL, Microservices, postman, REST API, AWS, Git, GitHub, Docker

Experience

Java Developer(Intern)

Jun 2026 - Present

Infotact Solution

- Developed and maintained **Java-based backend applications** using **Core Java, Spring Boot, and RESTful APIs** for real-world projects.
- Collaborated with the development team to **design, test, debug, and optimize** scalable backend services while following clean coding and code review practices.
- Worked with **MySQL, Git, and Maven** to build, integrate, and maintain backend applications in an Agile development environment.

Tutor

Sep 2023 - Present

Urban Pro

- Instructed students on core Computer Science subjects—including Data Structures and Algorithms (DSA), Theory of Computation (TOC), Compiler Design, Operating Systems, Digital Logic, Computer Networks, C programming, and Java—on the UrbanPro platform, resulting in a 100% improvement in overall student performance, with every student passing the subjects I taught.
- Designed and delivered structured, easy-to-understand lessons that simplified complex concepts across these subjects, leading to a 25% increase in student engagement, clarity, and comprehension.

Analyst

Dec 2024 - Sep 2025

eClerx India Pvt Ltd

- Handle inbound customer calls to resolve issues related to home internet, WiFi connectivity, and TV cable services for US-based clients.
- Diagnose technical problems remotely and provide step-by-step guidance to restore services efficiently.

Subject Matter Expert

Nov 2021 - Sep 2023

CourseHero

- Resolved over 950 student queries across core Computer Science subjects, including Data Structures and Algorithms (DSA), Theory of Computation (TOC), Compiler Design, Operating Systems, Digital Logic, Computer Networks, C programming, and Java—helping students strengthen conceptual clarity and problem-solving skills.

Projects

HeapVortex | Java | Spring Boot | JVM | JMX | Eclipse MAT

<https://github.com/vhatkarsameer/heapvortex-java-fullstack>

- Architected a **Spring Boot backend** for a JVM diagnostic application, orchestrating automated heap dump analysis and serving data for **15,000+ memory objects** via **RESTful APIs**.
- Integrated secure **JMX telemetry over SSL/TLS** to safely connect and monitor remote JVMs, ensuring real-time, encrypted extraction of live memory metrics and reducing manual monitoring time by **80%**.
- Engineered a headless **Eclipse MAT integration** to parse **multi-gigabyte .hprof binary files**, utilizing algorithmic sorting to extract the heaviest memory footprints and accelerate leak detection.
- Containerized the backend infrastructure using **Docker** with dynamic volume mapping, achieving **1-click cross-platform deployments** and eliminating **100%** of OS-level file pathing discrepancies.

E-Commerce Platform | Java, Spring Boot, JPA, MySQL, Microservices

<https://github.com/sameervhatkar/EcommerceProductService>

- **Designed and developed 4+ Spring Boot microservices** for user management, product cataloging, order workflows, and payment processing, improving modularity and scalability of the application.
- **Integrated Razorpay payment gateway and implemented OAuth 2.0/JWT-based authentication**, ensuring secure and seamless transactions across all services.
- **Built RESTful APIs with clean architecture**, enabling smooth communication between microservices and improving response reliability and performance.
- **Created and executed comprehensive unit tests** using JUnit and Mockito, achieving **85%+ test coverage** and significantly reducing regression issues.

Movie Booking System | Java, Spring Boot, MySQL, Design Patterns

<https://github.com/sameervhatkar/BookMyShow>

- **Built a Spring Boot backend for a BookMyShow clone**, implementing core features such as movie listings, showtimes, seat selection, and ticket booking with clear service boundaries.
- **Developed secure user authentication and authorization** using JWT, enabling reliable sign-up, login, and session validation across endpoints.
- **Implemented RESTful CRUD operations** for movies, shows, theaters, and seats, including real-time seat availability tracking to prevent double-booking.
- **Architected scalable booking flow and prepared the system** for seamless payment gateway integration, improving overall user experience and modularity.

Education

Scaler	2024
Specialisation in Software Development	
Coursework: Data structures and Algorithms, Low-Level Design (LLD), High-Level Design (HLD), Java Backend.	
Chhatrapati Shivaji Maharaj Institute of Technology	2019
BE/B.Tech/Bs
